Java   React-Native

PROJECTS

OptaFloor (10/2022 - 02/2023)
- Responsibilities and Activities:
- Identifying and resolving issues and 60% bugs within the software related to data manipulation, API integration, and user interface (UI) issues.
- Working with data within the software, manipulating and organizing it to meet the requirements of the application.
- Major and Minor Enhancements: Implementing both significant and minor improvements to the software, potentially based on user feedback or business requirements.
- Redesigning and updating the user interface to a new version, possibly with improved aesthetics, usability, or functionality.
- **Tech Stack: React JS, JavaScript, Material UI, Redux, HTML, CSS**

License Manager (06/2023 - Present)
- Responsibilities and Activities:
- Designed and developed the front-end of a license manager application using React, ensuring an intuitive and responsive user interface.
- Implemented a secure login and logout system with credential-based authentication to protect user data and access.
- Created a dynamic dashboard page that provided users with a centralized view of license-related information, subscription status, and relevant statistics.
- Developed features for issuing and managing licenses within the application, including Create, Read, Update, and Delete (CRUD) operations.
- Integrated subscription management functionality, allowing users to view and modify their subscription plans.
- **Tech Stack: React JS, JavaScript, Material UI, Redux, HTML, CSS, Axios**

OptaPlan Mobile App
- Created a user-friendly interface for adding, editing, and deleting orders, enhancing the overall user experience.
- Utilized React Native components and libraries to ensure a responsive and intuitive user interface.
- Integrated state management solutions like Redux to efficiently manage and update order data.
- Implemented client-side validation to ensure data integrity and prevent errors in the order creation process.
- **Tech Stack:** React Native, JavaScript, Native base, Redux, axios
