Profile

- **Senior Java Developer with 5 years of experience in designing, developing, and maintaining scalable enterprise applications using Java, Spring Boot, Microservices, and distributed system architectures.**
- **Strong expertise in backend development using Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Spring Batch, RESTful APIs, and event-driven architectures with Apache Kafka.**
- **Hands-on experience in cloud-native application development and deployment using AWS services including S3, RDS, Route 53, Secrets Manager, and CI/CD pipelines.**
- **Proficient in developing secure, high-performance applications using Java 8/11/17.**
- **Experience in frontend development using React.js, Angular, TypeScript, JavaScript, Redux, HTML5, CSS3, and Material UI for building responsive web applications.**

Skills

Frontend Technologies

React.js, Angular, Redux Toolkit, Material UI, HTML5, CSS3, JavaScript, TypeScript

Backend Technologies

Spring Boot, Spring MVC, Spring Security, Spring Batch, Microservices• Hibernate, JPA, JDBC, RESTful APIs, GraphQL, WebSockets, JWT Authentication, OAuth 2.0

Messaging & Integration — Proficient

Apache Kafka, REST API Integration

Cloud & DevOps

AWS (S3, RDS, Route 53, Secrets Manager), Docker, Kubernetes, Jenkins, CI/CD Pipelines, Git, GitHub

Databases

PostgreSQL, MySQL, MongoDB

Architecture & Methodologies

Microservices Architecture, Design Patterns

Professional Experience

Associate, Talent cafe solutions

04/2026 – Present

Bangalore

- Worked at Pay10 on transaction service applications in the fintech domain.
- Handled payment processing workflows and backend service operations.
- Worked on FX rate handling and currency conversion for UAE and USD-based transactions.
- Developed and maintained remittance reports and transaction-related reporting modules.
- Built and maintained frontend features using Angular and integrated them with backend APIs.
- Worked on API integration, transaction workflows, and production issue debugging.
- Contributed to secure and scalable financial transaction processing systems.

Tech Stack:- Java, Spring Boot, Microservices, Angular, Apache Kafka REST APIs, MySQL, MongoDB

Senior Software developer, Concentrix

06/2025 – 03/2026

Project: Capital Group (FSR)

Chandigarh

- Designed and developed robust Spring Batch jobs to process high-volume inbound and outbound financial data, ensuring reliable and efficient data workflows.
- Developed batch processing solutions for data extraction, transformation, validation, and loading (ETL) operations across multiple systems.
- Participated in AWS cloud migration initiatives, contributing to the development, testing, and deployment of batch applications within cloud infrastructure.
- Utilized AWS services including S3, RDS, Route 53, and Secrets Manager for secure and scalable application deployment.
- Developed and maintained RESTful APIs using Spring Boot and Microservices architecture to support business-critical operations.
- Implemented Kafka-based asynchronous messaging for reliable communication between distributed services.
- **Tech Stack: Java 17, Spring Boot, Spring Batch, Microservices, Apache Kafka, PostgreSQL, AWS (S3, RDS, Route 53, Secrets Manager), JUnit, Git**

Software developer, Aura Cloud technology Pvt Ltd

04/2021 – 06/2025

Vauraus (Banking Domain)

Bangalore

Software Developer | Banking Domain

- Developed RESTful APIs using **Java, Spring Boot, and Spring Data JPA** for banking modules including **customer management, loan management, account management, and transaction processing**.
- Designed and implemented new API endpoints based on business requirements while maintaining secure and scalable backend services.
- Developed and enhanced **React.js** screens for customer onboarding, loan applications, account details, transaction history, and user management.
- Built responsive and reusable UI components using **React.js, JavaScript, HTML5, CSS3**, and managed application state using **Redux**.
- Implemented dynamic data tables with **search, sorting, filtering, and pagination** for customer, account, loan, and transaction records.
- Worked with **MySQL** to write, optimize, and tune SQL queries, stored procedures, and database operations.
- Implemented business validations, exception handling, and input validation to ensure secure and reliable banking transactions.
- Fixed production issues and resolved defects reported by QA, business users, and production support teams.
- Wrote **JUnit** test cases to improve code quality and maintain application reliability.

Tech Stack: Java 17, Spring Boot, Spring Data JPA, React.js, Redux, MySQL, REST APIs, JUnit, Git, Maven, HTML5, CSS3, JavaScript.

Education

Batchelor's in Engineering, Pacific institute of engineering and management.
