Profile

Front-End Developer with 4 years of experience specializing in **React.js** and **React Native**, with strong expertise in **HTML**, **CSS**, and **JavaScript**. Experienced in building responsive, high-performance web and mobile applications with clean, maintainable code. Proficient in **Flutter** for cross-platform app development and skilled in translating UI/UX designs into functional interfaces. Passionate about writing scalable solutions, optimizing performance, and collaborating with cross-functional teams to deliver quality products.

Professional Experience

Software developer, *Aura Cloud technology Pvt Ltd*

01/2020 – 05/2022

Banking Domain Projects

Bangalore

VORUS (P2P Lending Platform)

- Worked as a Frontend Developer on a banking domain project focused on peer-to-peer (P2P) lending for SMEs.
- Fixed UI bugs and enhanced overall user experience across the application.
- Developed and implemented new frontend features based on client requirements.
- Built and maintained reusable UI components using React.js, HTML, and CSS.
- Collaborated with cross-functional teams to ensure timely delivery and UI consistency.

CredPoint (Real-Time Credit Check Platform)

- Developed the CredPoint application from scratch as part of a banking and credit-risk platform.
- Designed and implemented the login and authentication module.
- Integrated multiple backend services to support real-time credit check functionality.
- Created responsive, secure, and user-friendly interfaces using React.js, HTML, and CSS.
- Followed best practices to build a scalable frontend aligned with banking domain standards.

Jaza Software(OPC) Pvt Ltd., *Software Developer*

06/2022 – 04/2025

Project: OptaFloor (OptaFloor Optimization & Real-Time Monitoring System)

Bangalore, india

- Worked as a Frontend Developer on the OptaFloor application, an apparel domain system used for real-time factory floor monitoring and problem analysis.
- Developed multiple business-critical features including Aggregate Reports, Rework Reports, and Downtime Reports.
- Designed and implemented Rework Dashboards to track real-time production issues and quality rework data.
- Built interactive dashboards providing line-wise, finishing-wise, factory-wise, and overall production visibility.
- Created multiple analytical dashboards to help management identify bottlenecks and improve operational efficiency.

Project: License Manager

- Worked on a License Manager application responsible for managing and validating software licenses.
- Contributed to the development of features for license activation, validation, and access control.
- Helped ensure that application usage complied with assigned license limits and rules.
- Developed and enhanced UI components using React.js, JavaScript, HTML, CSS, and Material UI.
- Collaborated with backend services to display license status, usage details, and validation results.Improved usability and reliability of license management workflows.

Software developer, *Concentrix*

06/2025 – Present
Chandigarh

Project: Poshmark (E-Commerce Platform)

- Developed multiple end-to-end screens and UI components required for a complete e-commerce application.
- Implemented product listing screens with filtering and navigation support.
- Built product detail pages displaying item information, images, pricing, and actions.
- Developed cart-related components and reusable UI cards for product and order display.
- Integrated payment flow screens, including checkout and payment pages.
- Implemented user interaction features such as add-to-cart, navigation, and basic user actions.
- Designed and maintained navigation components for smooth user flow across the application.
- Created reusable and responsive components using React.js, JavaScript, HTML, CSS, and Material UI.
